LDT505:

The information contained on this page is designed to give students a representative example of material covered in the course. Any information related to course assignments, dates, or course materials is illustrative only. For a definitive list of materials, please check the online catalog 3-4 weeks before the course start date.

LDT 505 *Integrating Mobile Technologies into Learning Environments* (3.0 credits): Research on learning with mobile computers and models for mobile computer integration for K-12 schools, community organizations, and universities.

Overview | Course Goals | Materials | Technical Requirements | Course Requirements and Grading | Course Schedule | Academic Integrity | Policies

---

Overview

LDT 505 Integrating Mobile Technologies into Learning Environments is a research-to-practice course. In LDT 505, you will read articles from the learning sciences and educational technology perspectives to examine how people use and learn with mobile devices in their everyday lives. (Mobile devices include computer tablets such as iPads or MS Surfaces, smartphones, digital cameras, MP3 players, fitness trackers such as FitBits, GPS devices, Chromebooks or other notebook computers, handheld gaming consoles such as a Nintendo Switch or DS, and other small digital technologies.) Then you will apply these readings to your own final project, which can serve as one of three entries into the LDT M.Ed. capstone portfolio.

At the end of the course, you will understand the possibilities of using mobile computers as learning supports so that you can become an educated critic and a competent integrator of mobile computers in learning environments—as mobile technologies change and evolve over time. The class includes mobile technologies learning research from across the world.

Four topics are covered in LDT 505:

1. how people use mobile computers in their everyday lives,
2. key themes and theories that can help us analyze how people learn with and use mobile technologies,
3. research findings from empirical studies to tell us about how people learn with mobile forms of digital computing, and
4. integrating mobile devices into the design of learning environments in ways that utilize modern perspectives on learning, maximize the strengths of the mobile computing, and maintaining people's expectations for the use of these everyday technologies.

As a graduate seminar, this course will provide you with competencies toward understanding how to support learning with technology. You may have seen internet-based lists of the top 10 apps for education or five mobile learning tools for workplace learning; however, this seminar is not a "how to" tool workshop covering specific technological solutions. Instead, over the semester, you will develop an understanding of how to use theory, educational frameworks, and empirical research to create learner-centered guidelines for integrating mobile technologies in educational programs in a variety of settings. Most importantly, you will apply these understandings in a final project that addresses the unique needs of the organizations or research project with which you work.

In addition to activities for the whole class, you will join in one of the three course strands, depending on your interests:

a. mobile technologies with *families and young people* in and out school,

b. mobile technologies with *adults in higher education* (includes distance education), and

c. everyday people using mobile technologies in *personal hobbies, communities, and cultural institutions*.

Within your strand, you will select readings (from a provided list or through discussions with the instructor) based on your own interests. The intention of specializing in one of the three course strands is to provide you with an individualized specialty to support your M.Ed. capstone project or doctoral research.

Course Goals

- Understand how people use mobile devices across the globe for personally consequential activities.
- Identify and comprehend themes and theoretical perspectives that educators and researchers have developed to understand how people learn with mobile technologies.
- Analyze the constraints and affordances of designing for mobile learning devices regarding informal and formal learning environments (e.g., homes, schools, universities, community centers, libraries, workplace, and museums).
- Synthesize and apply theories in a final project where course themes are applied to a personally relevant project (e.g., a developed mobile learning project, set of lesson plans across your curriculum, an integrated unit, a BYOD or other policy statement, or literature review supporting your M.Ed. or doctoral specialty).

Required Course Materials

There is no textbook for this course. All of the reading materials are available through the Penn State Libraries (e-Reserves or through provided hyperlinks).

This course requires that you access Penn State library materials specifically reserved for this course. You can access these materials by selecting Library Resources in your course navigation, or by accessing the Library E-Reserves Search (https://guides-libraries-psu-edu.ezaccess.libraries.psu.edu/er.php?b=c) and search for your instructor's last name.

Using the Library

Many of the University Libraries resources can be utilized from a distance. Through the Libraries website, you can

- access magazine, journal, and newspaper articles online using library databases;
- borrow materials and have them delivered to your doorstep—or even your desktop;
- get research help via email, chat, or phone using the Ask a Librarian service; and
- much more.

You must have an active Penn State Access Account to take full advantage of the Libraries' resources and service. The Off-Campus Users page (https://libraries.psu.edu/world) has additional information about these free services.

Technical Requirements

Technical Requirements and Help

Operating System	Canvas, Penn State's Learning Management System (LMS), supports most recent versions of Microsoft Windows and Apple Mac operating systems. To determine if your operating system is supported, please review Canvas' computer specifications (https://community.instructure.com/en/kb/articles/662718-what-are-the-browser-and-computer-requirements-for-instructure-products) .
Browser	Canvas supports the last two versions of every major browser release. It is highly recommended that you update to the newest version of whatever browser you are using. Please note that Canvas does not support the use of Internet Explorer. Students and instructors should choose a different browser to use. To determine if your browser is supported, please review the list of Canvas Supported Browsers (https://community.instructure.com/en/kb/articles/662718-what-are-the-browser-and-computer-requirements-for-instructure-products) . --- **Note**: Cookies must be enabled, and pop-up blockers should be configured to permit new windows from Penn State websites.
Additional Canvas Requirements	For a list of software, hardware, and computer settings specifically required by the Canvas LMS, please review Canvas' computer specifications (https://community.canvaslms.com/t5/Canvas-Basics-Guide/What-are-the-browser-and-computer-requirements-for-Instructure/ta-p/66) .
Additional Software	All Penn State students have access to Microsoft Office 365 (https://student.worldcampus.psu.edu/a-z-index/office-365) , including Microsoft Office applications such as Word, Excel, and PowerPoint. Students will need a PDF reader, such as Adobe Reader (https://get.adobe.com/reader/) .
Hardware	**Monitor:** Monitor capable of at least 1024 x 768 resolution **Audio:** Microphone, Speakers **Camera** (optional, recommended)**:** Standard webcam **-** many courses may require a webcam for assignments or exam proctoring software.
Mobile Device (optional)	The Canvas mobile app is available for versions of iOS and Android. To determine if your device is capable of using the Canvas Mobile App, please review the Canvas Mobile App Requirements (https://community.instructure.com/en/kb/articles/388741-unknown) .
Help	If you need technical assistance at any point during the course, please contact the Service Desk (https://www.it.psu.edu/support/) .

Student Education Experience Questionnaire (SEEQ)

During the semester you will receive information about completing the Student Education Experience Questionnaire (SEEQ). Your participation is an opportunity to provide anonymous feedback on your learning experience. Your feedback is important because it allows us to understand your experience in this course and make changes to improve the learning experiences of future students. Please monitor email and course communications for links and availability dates.

If you need technical assistance at any point during the course, please contact the Service Desk (https://www.it.psu.edu/support/) .

For registration, advising, disability services, help with materials, exams, general problem solving, visit World Campus Student Services (https://student.worldcampus.psu.edu/) !

Course Requirements and Grading (Total 150 points)

Given Penn State's expectations for coursework, you'll spend approximately 150 hours on course materials. About half of your time will be spent in online discussions by reading and writing blog posts about the course materials. The other half of your time will be spent on projects applying course ideas to your current (or future) workplace or research interest.

Total class points for projects and participation: 150 points

Projects (82/150 total points): 55% of grade

- **App rating and review** (5 reviews and ratings): 17 points
- **Design document and chart** (3 pages): 15 points
- **Final project** (8–12 pages of academic reflection and designed project plus the reworked design document and chart (an additional 1–2 pages) and final project references (an additional 1 page)): 50 points

Ongoing class participation through blogs (68/150 total points): 45% of grade

- **Welcome blog post** on your blog for the Getting Started Lesson (1 post at 5 points): 5 total points.
- **7 substantial blog posts** on your blog, discussing 2–3 articles and of at least 400 words (7 posts at 5 points each): 35 total points.
- **14 blog responses/comments** on two of your peers' blogs of at least 150 words per response (14 posts at 2 points each): 28 total points.

The scoring guide for the blog posts is explained in detail in the Sites/Blogs link in the navigation. Please note that all assignments are due by North American eastern time (ET).

The following grading scale will be used to determine your overall course grade.

Grading Scale

Percentage	Letter grade
93-100	A

Percentage	Letter grade
90-92.9	A-
86-89.9	B+
83-85.9	B
80-82.9	B-
77-79.9	C+
70-76.9	C
60-69.9	D
0-59.9	F

Course Schedule

Each lesson will begin on a Wednesday and end on a Tuesday. Some lessons are one week long and others two weeks long; at the end of the term, you will spend two weeks on your final project.

Lesson 1	Getting Started and Mobile Technology Use Around the Globe
Readings	• Pea, R. D., & Maldonado, H. (2006). WILD for learning: Interacting through new computing devices anytime, anywhere. In R. K. Sawyer (Ed.), *The Cambridge handbook of the learning sciences* (pp. 427–441). Cambridge University Press. [Chapter 25, Course E-Reserves] • Sharples, M. (2013). Mobile learning: Research, practice and challenges (http://oro.open.ac.uk/37510/) . *Distance Education in China*, *3*(5), 5–11. • Dolan, J. E. (2016). Splicing the divide: A review of research on the evolving digital divide among K–12 students. *Journal of Research on Technology in Education*, *48*(1), 16–37. https://doi.org/10.1080/15391523.2015.1103147 [Course E-Reserves] • Yardi, S., & Bruckman, A. (2012, May). Income, race, and class: Exploring socioeconomic differences in family technology use. Proceedings of the *2012 ACM Annual Conference on Human Factors in Computing Systems* (pp. 3041–3050). ACM. • Optional: Pick 1–3 *Horizon Report* chapters (2–3 pages each) about a topic related to mobile computing that you know little about (such as BYOD policies, wearable devices, mobile learning, e-books, apps). ◦ The *Horizon Reports* are organized into three categories: higher education, K-12, and community/museum/libraries. Pick any topic in any category that interests you.

Lesson 1	Getting Started and Mobile Technology Use Around the Globe
Assignments	• Gain familiarity with the World Campus and Penn State system, including World Campus Help Desk, Library Course E-Reserves, and the Online Course Environment. • **Blog Posts** ◦ Set up your blog through Sites at Penn State; you can re-use an existing Sites at Penn State blog if you prefer. ◦ **Write an introductory blog post** about yourself and your interests in mobile computers on your blog, and discuss the Pea and Maldonado (2006) article. ◦ Write a **substantial Lesson 1 blog post** based on Dolan (2016), Sharples (2013), and Yardi and Bruckman (2012). ◦ Read and comment on two group members' blog posts. • Fill out the **Google survey** with your blog URL and other background information. You need to have set up your blog before you do this.

Lesson 2	Concepts and Theories Supporting Mobile Learning
Readings	• Bransford, J., Stevens, R., Schwartz, D., Meltzoff, A., Pea, R., Roschelle, J., Vye, N., Kuhl, P., Bell, P., Barron, B., Reeves, B., & Sabelli, N. (2006). Learning theories and education: Toward a decay of synergy. In P. Alexander & P. Winne (Eds.), *Handbook of educational psychology* (2nd ed., pp. 209–244). Erlbaum. [Course E-Reserves] • Sharples, M., Arnedillo-Sánchez, I., Milrad, M., & Vavoula, G. (2009). Mobile learning: Small devices, big issues. In N. Balacheff, S. Ludvigsen, et al. (Eds.), *Technology-enhanced learning: Principles and products* (pp. 233–249). Springer. • Pea, R., Nass, C., Meheula, L., Rance, M., Kumar, A., Bamford, H., Nass, M., Simha, A., Stillerman, B., Yang, S., & Zhou, M. (2012). Media use, face-to-face communication, media multitasking, and social well-being among 8- to 12-year-old girls. *Developmental Psychology*, *48*(2), 327–336. • Gee, J. P. (2000). Identity as an analytic lens for research in education. *Review of Research in Education*, *25*(2000-2001), 99–125. **Read pp. 99–111 only**; the rest is optional. • *Optional*: ◦ Turkle, S. (2008). Always-on/always-on-you: The tethered self. In J. Katz (Ed.), *Handbook of mobile communication studies* (pp. 121–137). MIT Press.

Lesson 2	Concepts and Theories Supporting Mobile Learning
Assignments	**View** • Watch the short video *Connected Learning, Children, and Digital Media* by Dr. Mimi Ito from UC Irvine available in the lesson commentary. **Optional Viewing (available in the lesson commentary)** • Watch the interview with Dr. Turkle on Comedy Central's *Colbert Report*. **Blog Posts** • Write a **substantial Lesson 2 blog post** discussing learning theory and identity and its importance in learning. ◦ Apply the Gee reading on identity through the design of a digital meme about YOUR identity. Post the meme to your blog. • Read and comment on two group members' blog posts.

Lesson 3	Models Advancing Mobile Technology Integration
Readings	• Looi, C.-K., Seow, P., Zhang, B., So, H.-J., Chen, W., & Wong, L.-H. (2010). Leveraging mobile technology for sustainable seamless learning: A research agenda. *British Journal of Educational Technology*, *41*(2), 154–169. • Kearney, M., Schuck, S., Burden, K., & Aubusson, P. (2012). Viewing mobile learning from a pedagogical perspective (https://journal.alt.ac.uk/index.php/rlt/article/view/1225) . *Research in Learning Technology*, *20*(1), 1–17. • Churchill, D., Fox, B., & King, M. (2016). Framework for designing mobile learning environments. In D. Churchill, J. Lu, T. Chiu, & B. Fox (Eds.), *Mobile learning design: Theories and applications* (pp. 3–25). Springer. • *Optional:* ◦ Wong, L.-H. (2012). A learner-centric view of mobile seamless learning. *British Journal of Educational Technology*, *43*(1), E19–E23.
Assignments	**Blog Posts** • Write a **substantial Lesson 3 blog post** on where you first describe the frameworks/models for integrating mobile devices in learning environments and then apply these models to your current or potential workplace. How could these models serve the learners that you work with? • Read and comment on two group members' blog posts. Specifically, pay attention to how they applied the models/frameworks for integrating mobile devices into their learning setting.

Lesson 4	New Forms of Learning Supported by Mobile Tools
Readings	Select **3 articles** from the following list that discuss technology useful on mobile computers (augmented reality, badging, digital photography, e-books, gaming/AR, or wearables/exergames). • Augmented Reality (especially games): Dunleavy, M., & Dede, C. (2014). Augmented reality teaching and learning. In J. M. Spector et al. (Eds.), *Handbook of research on educational communications and technology* (pp. 735–745). Springer. • Augmented Reality (all kinds): Novak, D., Wang, M., & Callaghan, V. (2012). Looking in, looking out: A discussion of the educational affordances of current mobile augmented reality technologies. In J. Jai (Ed.), *Educational stages and interactive learning: From kindergarten to workplace training* (pp. 92–206). Information Science Reference. • Augmented Reality Toys: Han, J., Jo, M., Hyun, E., & So, H. J. (2015). Examining young children's perception toward augmented reality-infused dramatic play. *Educational Technology Research and Development*, *63*(3), 455-474. • Augmented Reality (in workplace/military application): Champney, R., Lackey, S. J., Stanney, K., & Quinn, S. (2015). Augmented reality training of military tasks: Reactions from subject matter experts. In R. Shumaker & S. Lackey (Eds.), *Virtual, augmented and mixed reality* (pp. 251–262). Springer International Publishing. • Badging: Gamrat, C., Zimmerman, H. T., Dudek, J., & Peck, K. (2014). Personalized workplace learning: An exploratory study on digital badging within a teacher professional development program. *British Journal of Educational Technology*, 1136–1148. • Badging: Gamrat, C., & Zimmerman, H. T. (2015). An online badging system supporting educators' STEM learning. In D. Hickey, J. Jovanović, S. Lonn, & J. E. Willis (Eds.), *Proceedings of the 2nd International Workshop on Open Badges in Education Co-Located with the 5th International Learning Analytics and Knowledge Conference (LAK 2015)* (pp. 12–23). CEUR Workshop Proceedings (http://ceur-ws.org/Vol-1358/) . • Badging: Davis, K., & Singh, S. (2015). Digital badges in afterschool learning: Documenting the perspectives and experiences of students and educators. *Computers & Education*, *88*, 72–83. • Digital Photography: Land, S. M., Smith, B. K., & Zimmerman, H. T. (2013). Mobile technologies as mindtools for augmenting observations and reflections in everyday informal environments. In *Learning, problem solving, and mindtools: Essays in honor of David H. Jonassen* (pp. 214–228). Taylor and Francis. • E-Books: Davidson, A.-L., & Carliner, S. (2014). E-books for educational uses. In J. M. Spector et al. (Eds.), *Handbook of research on educational communications and technology* (pp. 713–722). Springer.

Lesson 4	New Forms of Learning Supported by Mobile Tools
	• Gaming/AR: Martin, J., Dikkers, S., Squire, K., & Gagnon, D. (2014). Participatory scaling through augmented reality learning through local games. *TechTrends*, *58*(1), 35–41. • Probes with AR: Kamarainen, A. M., Metcalf, S., Grotzer, T., Browne, A., Mazzuca, D., Tutwiler, M. S., & Dede, C. (2013). EcoMOBILE: Integrating augmented reality and probeware with environmental education field trips. *Computers & Education*, *68*, 1–12. • Wearables/Exergames: Lee, V. R., Drake, J. R., Cain, R., & Thayne, J. (2015). Opportunistic uses of the traditional school day through student examination of Fitbit activity tracker data. In *Proceedings of the 14th International Conference on Interaction Design and Children* (pp. 209–218). ACM. • Wearables/Exergames: Schaefer, S. E., Ching, C. C., Breen, H., & German, J. B. (2016). Wearing, thinking, and moving: Testing the feasibility of fitness tracking with urban youth. *American Journal of Health Education*, *47*(1), 8–16.
Assignments	**Blog Posts:** • Post **substantial Lesson 4 blog post** discussing all the Lesson 4 readings. • Read and comment on two group members' blog posts.

Lesson 5	Analyzing Tools for Mobile Computers with Learning and Education Frameworks
Readings	• Institute of Museum and Library Services. (2009). *Museums, libraries, and 21st century skills* (https://www.imls.gov/sites/default/files/publications/documents/21stcenturyskills.pdf) . **Read pp. 4–16 and 25–28**; the rest is optional. • Gerstein, J. (2013). Team and community building using mobile devices. In Z. L. Berge & L. Y. Muilenburg (Eds.), *Handbook of mobile learning* (pp. 268–284). Routledge. [Course E-Reserves]**. Read the full chapter to think about how apps can be used to support the development of 21st-century skills.** • Notari, M. P., Hielscher, M., & King, M. (2016). Educational apps ontology. In D. Churchill, J. Lu, T. Chiu, & B. Fox (Eds.), *Mobile learning design* (pp. 83–96). Springer.
Assignments	• **Application Rating and Review**: Identify at least **5 apps** that could serve a need for the group(s) you work with or want to work with. Try these apps out on a mobile device of your choosing. Rate the app in the class's shared Google Doc. • Post a review and critique of each app on your blog. (Use the class readings from this lesson and past lessons!) • **List each review as a separate blog entry on your own blog.**

Lesson 6	Examples of Mobile Computers in Learning Environments & Pick Your Final Project
Readings	• Select and read **1 short article** (10 pages or less) from the list: ◦ Jones, A. C., Scanlon, E., & Clough, G. (2013). Mobile learning: Two case studies of supporting inquiry learning in informal and semiformal settings. *Computers & Education*, *61*, 21–32. ◦ Ahmed, S., & Parsons, D. (2013). Abductive science inquiry using mobile devices in the classroom. *Computers & Education*, *63*, 62–72. ◦ Martin, F., Pastore, R., & Snider, J. (2012). Developing mobile based instruction. *TechTrends*, *56*(5), 46–51. ◦ Hsu, Y.-C., & Ching, Y.-H. (2012). Mobile microblogging: Using Twitter and mobile devices in an online course to promote learning in authentic contexts (https://eric.ed.gov/?id=EJ1001713) . *The International Review of Research in Open and Distributed Learning*, *13*(4), 211–227. ◦ Sana, F., Weston, T., & Cepeda, N. J. (2013). Laptop multitasking hinders classroom learning for both users and nearby peers. *Computers & Education*, *62*, 24–31. ◦ White, T., & Martin, L. (2014). Mathematics and mobile learning. *TechTrends*, *58*(1), 64–70. ◦ Zydney, J. M., & Hooper, S. (2015). Keeping kids safe from a design perspective: Ethical and legal guidelines for designing a video-based app for children. *TechTrends*, *59*(2), 40–46. (Simon Hooper is a professor in the LDT program.) • Select 2 empirical (research) articles from the topic-specific reading list in the lesson. ◦ You may also find your own articles using the list of articles on Lesson 6 page 4 Select and Read: Articles Related to Your Specialization (and Final Project), or on Lesson 7 page 3 Select and Read: Mobile Technology Articles of Interest to You. These articles should be current from 2011 or newer. They should be related to the topic of your final paper! • Find one online example (a case study) of learning with mobile technology; post a link of this example to your blog.
Assignments	**Blog Posts** • Post **substantial Lesson 6 blog post** discussing all the Lesson 6 readings. • Read and comment on two group members' blog posts.

Lesson 7	Technological Integration in Your Setting
Readings	• Read 3 articles from the reading list that can be found in the lesson. Or use the list of approved journals to find other articles. ◦ These articles should be related to the topic of your final design project for this class (or literature review, if you are choosing that option)!
Assignments	• Post **substantial Lesson 7 blog post**. Tell us about the article you selected and how it helps you understand mobile computing in your setting. • Read and comment on two group members' blog posts.

Lesson 8	Design Document Chart: Applying Research Findings to Educational Practice
Readings	• Find your own articles using the list of articles from Lesson 6 page 4 Select and Read: Articles Related to Your Specialization (and Final Project), or on Lesson 7 page 3 *Select and Read: Mobile Technology Articles of Interest to You*. These articles should be current from 2011 or newer. They should be related to the topic of your final paper!
Assignments	• Post **substantial Lesson 8 blog post** (your last blog post!) where you discuss what you learned about integrating mobile technology. Include a summary of the articles that you selected to read for Lesson 8. ◦ Note: Your substantial blog post and peer comments on Lesson 8's post will be due in Lesson 9. • Begin planning your final project. • Write a 3-page single-spaced design document with a design principles chart that will show how research findings and theory inform the design of your final project in Lesson 9. ◦ This is part of your final project. You will get feedback on this design document at the start of Lesson 9 so you can include the feedback to make a stronger final project. ◦ **Remember,** LDT M.Ed. students can use their final project from LDT 505 as one of the three required projects included in the Capstone Portfolio required for graduation.

Lesson 9	Final Project
Readings	None

Lesson 9	Final Project
Assignments	Choose from one of the following three options. Post your final project or a link to your final project on your blog. Also upload to Canvas. **In ALL Options** • NO NEW REFLECTIVE BLOG POSTS DUE. • Blog Response ◦ Read and comment on two group members' blog posts from Lesson 8. • **Remember:** LDT M.Ed. students can use their final project in LDT 505 as one of the three required projects included in the Capstone Portfolio required for graduation. **Option 1** • Spend the rest of the course developing a project related to learning in your setting and with your target audience. You can design something new using Google Mobile Sites (https://www.thinkwithgoogle.com/marketing-strategies/app-and-mobile/speed-is-key-optimize-your-mobile-experience/) , QR codes, ARIS, Taleblazer, or some other online environment. Or you can create a lesson, training, or workshop plan where you integrate mobile computers into a learning environment. You can create a BYOD plan for mobile computers in your setting. You can create a blueprint for an app you would like to make. Include the actual lesson plans, policy document, website text, and/or screenshots of your project in your final paper. • After completing your project, expand your design document from Lesson 8 into a 1.5- to 3-page single-spaced reflective essay where you use two to three concepts from the course reading to support your design choices. Revise the design principle chart from Lesson 8 (1- to 2-page single-spaced chart) to support your final project based on instructor feedback. • Upload your project, reflection, and revised design principle chart as one document into Canvas. It is anticipated that as a whole, your designed/developed project and your reflective essay will be approximately 8–12 pages single-spaced. (If you design something in ARIS/Taleblazer, Google Sites, WordPress etc., you can include website text and screenshots.) The revised 1–2 pages of the design principle chart are not included in that total. **Option 2** • Look through the online museum exhibit for "Places of Invention" in this lesson's content. • Develop a case study on integrating mobile technologies into the Smithsonian Institute's upcoming exhibit: *Place of Invention: the National Museum of American History (PoI)*. Navigate through the online PoI museum exhibit. Imagine that you are bringing learners to visit the physical museum space in Washington, DC. Consider how you would integrate mobile technologies for that specific group of learners (adults, children, families, etc.). • Write an 8- to 12-page case study paper where you design an educational experience for visitors based on the course's recommendations for including mobile learning technologies into the actual exhibit. You can (a) prepare learners for going to the exhibit; (b) support their

Lesson 9	Final Project
	learning while in the exhibit; and/or (c) extend their learning back in the classroom, workplace, summer camp, or other learning environment after the visit. Use the readings from the course to support the choices you make in the case study. Creativity is encouraged. Include the actual lesson plans, website text, and/or screenshots of your project in your final paper. • The case study should include your design and 1.5–3 single-spaced pages of a reflective essay where you use two to three concepts from the course reading to support your design choices. • Revise the design principle chart from Lesson 8 (1–2 single-spaced pages) to support your final project based on instructor feedback. • Upload your project, reflection, and revised design principle chart as one document into Canvas. Combined, your designed/developed project and your reflective essay should equal approximately 8–12 single-spaced pages. (If you design something in ARIS/Taleblazer, Google Sites, WordPress etc., you can include website text and screenshots). The revised 1–2 single-spaced pages of the design principle chart are not included in that total. **Option 3** • Provide a scholarly 12- to 15-page double-spaced literature review, plus a revised version of the design principle chart from Lesson 8. Your reference list, title page, abstract, and your design principle chart do not count in the page-limit minimum. (Topic must be approved by Lesson 6.)

If, for reasons beyond the student's control, a student is prevented from completing a course within the prescribed time, the grade in that course may be deferred with the concurrence of the instructor. The symbol DF appears on the student's transcript until the course has been completed. Non-emergency permission for filing a deferred grade must be requested by the student before the beginning of the final examination period. In an emergency situation, an instructor can approve a deferred grade after the final exam period has started. Under emergency conditions during which the instructor is unavailable, authorization is required from one of the following: the dean of the college in which the candidate is enrolled; the executive director of the Division of Undergraduate Studies if the student is enrolled in that division or is a provisional student; or the campus chancellor of the student's associated Penn State campus.

For additional information please refer to the Deferring a Grade (http://student.worldcampus.psu.edu/deferring-grade) page.

Academic Integrity

According to Penn State policy G-9: Academic Integrity (https://aappm.psu.edu/policy/g-9-academic-integrity) (for undergraduate students in undergraduate courses) and policy GCAC-805 Academic Integrity (https://gradschool.psu.edu/graduate-education-policies/gcac/gcac-800/gcac-805-academic-integrity) (for graduate students and undergraduate students in graduate courses), an academic integrity violation is “an intentional, unintentional, or attempted violation of course or assessment policies to gain an academic advantage or to advantage or disadvantage another student academically.” Unless your instructor tells you otherwise, you must complete all course work entirely on your own, using only sources that have been permitted by your instructor, and you may not assist other students with papers, quizzes, exams, or other assessments. If your instructor

allows you to use ideas, images, or word phrases created by another person (e.g., from Course Hero or Chegg) or by generative technology, such as ChatGPT, you must identify their source. You may not submit false or fabricated information, use the same academic work for credit in multiple courses, or share instructional content. Students with questions about academic integrity should ask their instructor **before submitting work.**

Students facing allegations of academic misconduct may not drop/withdraw from the affected course unless they are cleared of wrongdoing (see G-9: Academic Integrity (https://aappm.psu.edu/policy/g-9-academic-integrity) or GCAC-805 Academic Integrity (https://gradschool.psu.edu/graduate-education-policies/gcac/gcac-800/gcac-805-academic-integrity) as appropriate). Attempted drops will be prevented or reversed, and students will be expected to complete course work and meet course deadlines. Students who are found responsible for academic integrity violations face academic outcomes, which can be severe, and put themselves at jeopardy for other outcomes which may include ineligibility for Dean's List, pass/fail elections, and grade forgiveness. Students may also face consequences from their home/major program and/or The Schreyer Honors College.

How Academic Integrity Violations Are Handled
World Campus students are expected to act with civility and personal integrity; respect other students' dignity, rights, and property; and help create and maintain an environment in which all can succeed through the fruits of their own efforts. An environment of academic integrity is requisite to respect for oneself and others, as well as a civil community.

In cases where academic integrity is questioned, procedures allow a student to accept or contest/appeal the allegation. If a student chooses to contest/appeal the allegation, the case will then be managed by the respective school, college or campus Academic Integrity Committee. Review procedures may vary by college, campus, or school, but all follow the aforementioned policies.

All academic integrity violations are referred to the Office of Student Accountability and Conflict Response (https://studentaffairs.psu.edu/student-accountability) , which may assign an educational intervention and/or apply a Formal Warning, Conduct Probation, Suspension, or Expulsion.

Information about Penn State's academic integrity policy is included in the information that students receive upon enrolling in a course. To obtain that information in advance of enrolling in a course, please contact us by going to the Contacts & Help page (http://student.worldcampus.psu.edu/contacts-help-current-students) .

Accommodating Disabilities

Penn State welcomes students with disabilities, whether permanent or temporary, visible or hidden, into the University's educational programs. Every Penn State campus has an office for students with disabilities, including World Campus. The Disabilities and Accommodations (https://student.worldcampus.psu.edu/inclusion-and-wellness/disabilities-and-accommodations) section of the Chaiken Center for Student Success website provides World Campus students with information regarding how to request accommodations, documentation guidelines and eligibility, and appeals and complaints. For additional information, please visit the University's Student Disability Resources website (http://equity.psu.edu/sdr) .

In order to receive consideration for reasonable accommodations, you must contact the appropriate disability services office (https://equity.psu.edu/offices/student-disability-resources/campus-offices) at the campus where you are officially enrolled, participate in an intake interview, and provide documentation. If the documentation supports your request for reasonable accommodations, your campus's disability services office will provide you with an accommodation letter. Please share this letter with your instructors and discuss the accommodations with them as early in your courses as possible. You must follow this process for every semester that you request accommodations.

Graduate students: Please see the Student Disability Resources website for graduate student resources (https://equity.psu.edu/offices/student-disability-resources/graduate-students-with-disabilities) .

Students with disabilities participating in internship, practicum, student teaching, or other experiential learning opportunities as part of their degree requirements may also be eligible for reasonable accommodations to ensure equal access and opportunity. These accommodations are determined through an interactive process involving the student, their University supervisor, and the site supervisor. Student Disability Resources can assist students with identifying potential barriers, facilitating accommodation requests, and coordinating with University supervisors to promote inclusive learning experiences.

Additional Policies

For information about additional policies regarding Penn State Access Accounts; credit by examination; course tuition, fees, and refund schedules; and drops and withdrawals, please see the World Campus Student Center (https://student.worldcampus.psu.edu/) website.

If you have a crisis or safety concern, mental health services (http://student.worldcampus.psu.edu/inclusion-and-wellness/mental-health) are available to you as a Penn State student. Crisis and emergency contacts (https://student.worldcampus.psu.edu/help-and-support/crisis-and-emergency-help) are available, no matter where you are located:

- **Anywhere in the United States:** Call the Penn State Crisis Line at 1-877-229-6400 or text LIONS to 741741. You can also contact your local crisis services or hospital for emergencies.
- **Outside the United States**: Please contact emergency services in your current location. You can also use the International Crisis and Emergency Services listings (https://findahelpline.com/) .
- **At University Park:** Assistance is available at Counseling & Psychological Services (CAPS) locations (https://studentaffairs.psu.edu/counseling/UP-locations) on campus.
- **At a Penn State branch campus:** You can search for counseling information at your campus (https://studentaffairs.psu.edu/counseling/caps-campuses) .

Penn State takes great pride to foster a diverse and inclusive environment for students, faculty, and staff. Acts of intolerance, discrimination, or harassment due to age, ancestry, color, disability, gender, gender identity, national origin, race, religious belief, sexual orientation, or veteran status are not tolerated and can be reported through Educational Equity via the Report Bias webpage (http://equity.psu.edu/reportbias/) .

Military

Veterans and currently serving military personnel and/or dependents with unique circumstances (e.g., upcoming deployments, drill/duty requirements, VA appointments, etc.) are welcome and encouraged to communicate these, in advance if possible, to the instructor in the case that special arrangements need to be made.

Privacy Notice

In order to protect your privacy, course access is limited to those individuals who have direct responsibility for the quality of your educational experience. In addition to the instructor, a teaching assistant or college administrator may be provided

access in order to ensure optimal faculty availability and access. World Campus technical staff may also be given access in order to resolve technical support issues.

Student Responsibilities and Conduct

1. Students are responsible for online course content, taking notes, obtaining other materials provided by the instructor, taking tests (if applicable), and completing assignments as scheduled by the instructor. As a general rule, students should plan on logging into the course at least three times per week and spending at least three hours per course credit per week on the course, e.g., if the course is three credits, the student should plan on spending at least 9-12 hours per week on the course, just as they would in a residence course.
2. Students are responsible for keeping track of changes in the course syllabus made by the instructor throughout the semester.
3. Students are responsible for monitoring their grades.
4. Students must contact their instructor (and teammates when working on any collaborative learning assignments) as soon as possible if they anticipate missing long periods of online time due to events such as chronic illnesses, death in the family, business travel, or other appropriate events. The instructor will determine the minimal log on time and participation required in order to meet course responsibilities. In the event of other unforeseen conflicts, the instructor and student will arrive at a solution together.
    a. Instructors may require students to provide documentation with the class absence form or other written notification for events such as illness, family emergency, or a business-sanctioned activity.
    b. Conflicts with dates on which examinations or assignments are scheduled must be discussed with the instructor or TA (teaching assistant) prior to the date of the examination or assignment.
5. Students are responsible for following appropriate netiquette (network etiquette) when communicating with their instructor and classmates. For reference, see the Academic Success Kit (https://student.worldcampus.psu.edu/course-work-and-success/academic-skills) .
6. Behaviors that disrupt other students' learning are not acceptable and will be addressed by the instructor.
7. For severe and chronic problems with student disruptive behavior, the following will be applied for resolution:
    a. Senate Committee on Student Life policy on managing classroom disruptions: Office of Student Accountability and Conflict Response. (https://studentaffairs.psu.edu/student-accountability)
    b. Penn State Values. (https://universityethics.psu.edu/penn-state-values)

Disclaimer: Please note that the specifics of this Course Syllabus are subject to change, and you will be responsible for abiding by any such changes. Your instructor will notify you of any changes.
